Nintendo 3DS XL Screens

Nintendo 3DS XL has the largest screen made by Nintendo for any handheld console. The Screens of Nintendo 3DS XL are approx. 90% bigger than the screens of Nintendo 3DS system.

Nintendo 3DS XL has a screen resolution of 800×240 px (400×240 WQVGA per eye) for upper screen and 320×240 QVGA 24 bit color for lower screen which is also a touch screen to use stylus for various gameplay technics.

90%
Bigger Screen

System Transfer

Gamers who already owned a Nintendo 3DS system and buy a Nintendo 3DS XL system can easily transfer their data (images, save games, videos, downloads etc..) from Nintendo 3DS to the new Nintendo 3DS XL system. Transferring the data is simple and easy for the convenience of the player. Player can take more photos with the 3D cameras, can download more contents without being worried about the capacity of SD card while keeping all the data from the previous Nintendo 3DS system. Nintendo 3DS XL comes with a 4 GB SD card which can be expandable up to 2 TB via SD/SDHC/SDXC cards.

Battery Endurance Time

Nintendo 3DS XL has 90% larger screens than Nintendo 3DS and still have an improved battery life. Now you can play on the biggest screen ever made by Nintendo on any handheld console for much longer time and can enjoy the stunning graphics with great ease and not too much worry to re-charge the battery of Nintendo 3DS XL system. Improved battery life give longer experience of your favorite game while on the move or enjoying a multiplayer game with family and friends.

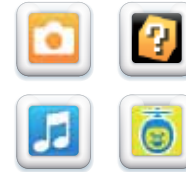

Improved Battery Life for Extra Large Screens of Nintendo 3DS XL

The battery life varies depending on the screen brightness.
The indicated battery life is a guideline figure. It may be shorter in some operating conditions.
The battery life changes accordingly to the usage.

Nintendo 3DS XL has two outer cameras to capture 3D photos & videos that can be viewed on the 3D Screen of Nintendo 3DS XL, and one inner camera to capture 2D photos. The AR Cards give the players a complete new experience in playing games. Capture AR Cards using the outer Camera and see the image change to a game stage in front of your eyes. MP3 & AAC audio file formats can be playable on Nintendo 3DS XL. With the fun built-in game "Face Raiders" Take a photo of yourself or your friend and that photo will turn into an enemy and attack you. Aim at the enemy in real world through the outer camera by moving the Nintendo 3DS XL system and then shoot!

Matters of which we wish to inform you in connection with Nintendo 3DS / Nintendo 3DS XL three-dimensional images

There are differences among individuals in terms of how they see 3D visuals. Please be advised that factors such as physical condition, media content and environment may all effect how any individual sees the 3D effect on the Nintendo 3DS / Nintendo 3DS XL system.

If you are tired or feeling unwell, please refrain from playing. If you feel sick please stop playing Nintendo 3DS / Nintendo 3DS XL immediately.

The use of the 3D feature by children aged six and under may cause vision damage. Therefore, it is recommended that:

*** Only children aged over 6 should use the system in 3D mode. * If children aged 6 and under have access to the system, parents or legal guardians should restrict the display of 3D images using the parental controls feature in system setting.**
